

GP online services

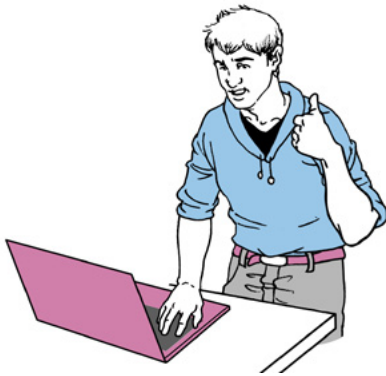

Quick, easy and safe

easy
read

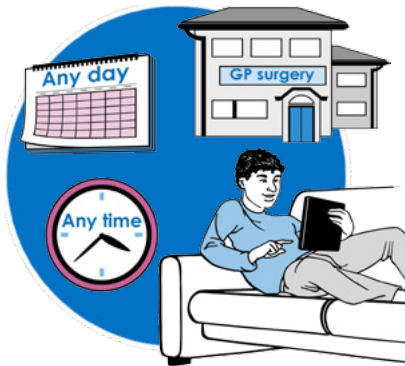

GP online services let you:

- book appointments
- order prescriptions
- see your GP record online

GP online services will help you keep control of your health and wellbeing.

We have heard that people want GP services to change.

- They want it to be easier to get an appointment.

- They need more choice and control in how they access them.

- They want to be more involved in decisions about their care and treatment.

Research has shown that patients who are told about and take part in decisions about their care are more likely to stay well and are less likely to go to hospital.

You can register for GP online services at your surgery.

Take some identification and proof of address with you so this can be done faster.

You can still visit or phone your GP surgery.

We know that some people do not have access to a computer, tablet or smartphone, or know how to use them.

If you want to get online and start using GP online services you can get some training from:

www.onlinecentresnetwork.org

or phone **0114 349 1666**

If you have a problem accessing GP online services please contact your GP surgery who will help you.
